AMENDMENT TO THE CLAIMS

1-29. (Cancelled)

30. (New) A portable information processor of remote diagnosis system for diagnosing by exchanging information with a support center system through a communication system comprising:

a communication unit for exchanging information with the support center system, and
a function unit housing for incorporating a detachable external unit,

wherein when the external unit is an inspection unit for inspecting the inspection object, the communication unit transmits at least one of the inspection data collected by the inspection unit and the analysis data obtained by analyzing the inspection data to the support center system, and receives the diagnosis result based on at least the inspection data and analysis data from the support center system, wherein

the function unit housing is provided with a reading device for reading a customer's credit information from any one of

customer's credit card,
customer's prepaid card,
customer's cash card,
customer's member card, and
customer's Internet settlement information,

the payment settlement information based on the customer's credit information is transmitted to the support center system by the communication unit.
